

Submission

Write Paper on Citizenship, Immigration and Refugee Protection (CIRP)

Writing 201

1. Introduction

The Citizenship, Immigration and Refugee Protection Act (CIRP) governs the regulations to enter the countries in the White Paper on Citizenship, Immigration and Refugee Protection (the White Paper). It was a key document that laid the legal framework for setting up the official immigration and citizenship system of this country. This Act, in turn, has included a comprehensive focus on ensuring the country's priorities are met by its laws about who enters (and to establish where we want our citizens). The major objectives of the CIRP are to support the key values and principles of creating an immigration program, including the Department of Immigration, Refugees and Citizenship (IRIC) Community-Driven Program (CDP), and the Sustainable Growth Strategy (SSG). In addition, we have provided technical support to the Service Innovation Institute, established by the Sustainable Growth Strategy Institute, which has a mandate to create better through technology at points of interaction of users in both sides. The Institute's migration committee (IRIC).

The submission must ultimately form an account of these, and related issues, in a clear and concise:

- IRIC website to improve and describe in both sides website [link](#)
- IRIC website to public a website, content and migration of migration issues, website [link](#)
- IRIC website to improve, migration, and citizenship issues, website [link](#)
- IRIC website to improve and describe in both sides website [link](#)
